

Manuka honey MGO 30+ (500g)

Brand: BIOSOTA ORGANICS

Price: 44.00 €

Short Description

Australian manuka honey 500g

Description

[Manuka honey](#), as we have come to know, is a special type of honey made by bees that feast on the nectar of a special tree found in Australia and New Zealand.

It is known as *Leptospermum scoparium*.

Numerous studies show honey and Manuka honey (minimum NPA 12+, MGO 350+ mg/kg) especially are good **at healing wounds with reduced scarring**. Manuka honey is set above other honey due to its naturally occurring [MGO](#) content giving this honey additional antibacterial properties compared to other honey.
